

Window Measuring Worksheet

Measure each window going around each of your rooms clockwise from left to right. When your order arrives you will then know which shutter is for which window. Please measure the width and height in two places of each window to make sure you get the smallest of the two measurements. Each of your windows must have a clearance of no less than 3 inches around the window (except if you have a sill under the window) and an inset of no less than 2 ½ inches deep.

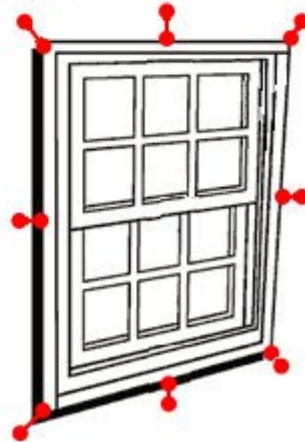

- 1.** Measure the Width in two places inside the window frame and choose the smaller of each measurement.

- 2.** Measure the Height in two places inside the window frame and choose the smaller of each measurement.

- 3.** Now make sure there is at least 3 inches of clearance all the way around each window and that the window is at least 2 ½ inches deep.

Order Details

Once complete, please tally up the sizes above you will require from our list of “standard Sizes” and enter them below.

Then return to our web site www.InstantShutter.com or use the “bookmark” which was saved in your browser upon your last visit to then place your order on our web site.

**Please round all window measurements DOWN to the nearest inch if over by 1/8 to 1/2 of an inch
or round all measurements UP to the nearest inch if over by 3/4 of an inch.**

(Example 22 3/4” X 58 1/4” would be a 23” X 58” Panel. Each panel will be larger than the window size ordered.)

Please save this sheet for when you order arrives so you can easily find which shutter belongs to each room and window.

Please note, if your window requires a shutter size that is not found on the above “Standard Sizes List”, please visit the FAQ on our web page for more information about ordering “custom” sizes, if available.
